

Trend

Sauleda, a pioneer Company in technical textiles manufacture presents its new fabric TREND a high security (FR) and effective solar protection.

TREND combines lightness and opacity. Its braided texture surprises us and at the same time allows its balanced integration to the current architecture and to the new decorative trends, according to the latest market researches.

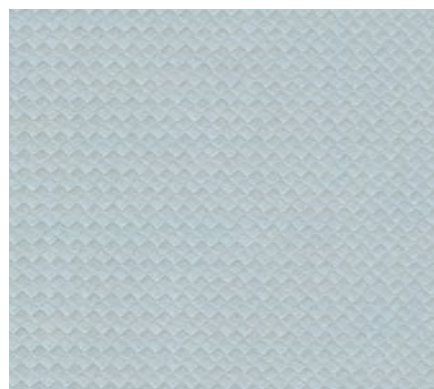

Its excellent thermal performance that provides a high thermal comfort, allows to reduce its temperature up to a 10 % and increases the feeling of freshness. All together with its other properties: flame retardant with a high security level, effective sun protection, extreme tensile strength and durability, easy maintenance.

TREND is a new fabric that provides solutions to hotel and restaurant professionals. It is manufactured in two qualities: normal and light. It marks a new trend in the manufacture of pergolas.

Technical characteristics		
		TREND
		TREND LIGHT
• Fabric		Polyester AT 1100 dex
• Width		250 cm
• Weight		±730 gr/m ²
• Thickness		0,57mm
• Finish		• Lacquered 2 f.
• Tensile strength	• Warp	300 daN/5 cm
	• Weft	200 daN/5 cm
• Tear strength	• Warp	30 daN
	• Weft	26 daN
• adhesion		10 daN/5 cm
• Fireproof		M2
• Roll length		50 ml

• APPLICATIONS
