

The Mitchell Group creates coated fabric upholstery products that meet the criteria outlined in the Healthier Hospitals Healthy Interior goals of the Safer Chemical Challenge. The healthcare products listed herein avoid the intentional use of polyvinyl chloride, phthalates, formaldehyde, perfluorinated compounds, chemical flame retardants and antimicrobials, or meet the exemption criteria stated in **Healthy Hospitals (HH) Safer Chemicals Challenge, Version 2***.

Mitchell's healthcare products are made with the highest quality polyurethane resin systems. All products share the following features:

- Meets all performance standards for coated fabrics as set by the Association of Contract Textiles (ACT) - USA.
- Resistant to ink stains, food stains, and topical stains - can be cleaned with soap and water.
- Resistant to quaternary, phenol and ammonia based chemical cleaners used in healthcare industry.
- Resistant to UV-C radiation disinfection.

**Material described herein meets the Healthy Interiors goal of the Safer Chemicals Challenge according to the manufacturer. Practice Greenhealth does not verify manufacturer information. For more information on the Healthier Hospitals Safer Chemicals Challenge, please visit: healthierhospitals.org/hhi-challenges/safer-chemicals*

The following Mitchell Group products (with number of colours) meet the criteria outlined in the Healthier Hospitals Healthy Interiors goals of the Safer Chemicals Challenge, Version 2*:
